

# VINYL EXTRUSION SCREW™

## Perfect for:

- ✓ Retro-fitting aluminum windows

The Vinyl Extrusion Screw™ is an adjustable, self-tapping screw ideal for vinyl window retro-fits over old aluminum window frames. It has a small low profile white powder coated head and tek drill point.

## KEY FEATURES & UNIQUE TECHNOLOGIES

### The Wedge and Shaft

- ▶ Snaps into the vinyl extrusion of the window frame.
- ▶ Allows the window to be adjusted and fastened securely.

### Powder Coated Head

- ▶ Provides the connection with a high withdrawal resistance.

### Tek Point

- ▶ Drill tip point with a small carving piece.

### Blade Cutting Thread

- ▶ Cuts a smooth path into natural or synthetic materials.

### Tight Star Recess System

- ▶ Allows for one-handed installation.
- ▶ Grasps the U-Bit tightly for a secure fit.
- ▶ Ensures a wobble-free experience and optimal force transmission.

## AVAILABLE SIZES

- ▶ Available in length of 10 x 3-1/8" in case hardened carbon steel
