

# THE DRIVING FORCE IN THE FASTENER INDUSTRY.

U2 fasteners™ is the GAME CHANGER in the fasteners industry. Fasteners that engineers and contractors agree on for your next project.

With 11 product lines, we have a diverse lineup of all essential screw types for construction or any other project.

# **Fasteners™** GAME CHANGER FACTS

BUILDING CODE COMPLIANT = QUALITY FROM THE START

CR 6+ FREE COATING = HEALTH & SAFETY

TIGHT RECESS = EFFICIENCY

TAPPER POINT = TIME SAVER

REAMER THREAD = BATTERY LIFE & PHYSICAL ENERGY SAVER

EFFICIENCY + PRODUCTIVITY = MONEY SAVED \$\$\$\$

## \* **Tight Star Recess**

This patented driving system is designed to grasp the **U-BIT** tightly and the fastener can be installed with one hand.

## \* **Reamer Thread**

Enlarges the hole in the material to create a better passage when drawing material together to reduce tensions on the screw.

## \* **Talon Grip**

Underneath the screw head of the **CS Screw** the **Talon Grip** holds the screw tight to prevent loosening and uses its nibs to dig into the material when countersunk.

## \* **Tapper Point**

The **Tapper Point** consists of the **Cork Screw Start**, **L-Cut outs** and **Blade Cutting Thread** for easy piercing and alleviating strain on the material.

## \* **Burrow Pockets**

The **Burrow Pockets** are underneath the head of the **Universal Screw** and work together to burrow and alleviate pressure when countersinking the head.

# UNIVERSAL SCREW

U2 fasteners™ Universal self tapping screw is ideal for replacing those old deck screws and is **Structural & ACQ treated lumber compliant in IAPMO report ER-454**. The Universal screw's features work together to drive and secure this screw in many types of materials that are used in residential construction. Features include the **Tapper Point**, which consists of the **Cork Screw Start**, **L-Cut outs** and **Blade Cutting Thread** for easy piercing and alleviating strain on the material. The **Tight Star Recess** system is designed to grasp the U-Bit tightly and can be installed with one hand. Underneath the Universal head **Burrow Pockets** are dynamically engineered to help countersink into the toughest of materials. Below the smooth shank is the **Reamer Thread**, which enlarges the hole to create a passage when drawing materials together and reduces tension for the screw head.

The U2 self tapping Universal Screw is available in lengths from 1/2" to 12" in hardened steel and from 1- 1/4" to 4" in 316 Grade Stainless Steel.

**#6, #8 screws take a T-15 U-Bit. #9, #10, #12 screws take a T-25 U-Bit.**

## CONSTRUCTION SCREW

The U2 CS is the next generation of self tapping construction screws that are replacing lag screws and is **Structural & ACQ treated lumber compliant in IAPMO report ER-454**. The **Dome Head** enhances the structural capability. The U2 CS has the essential features: the **Tapper Point** which consists of the **Cork Screw Start, L-Cut outs** and **Blade Cutting Thread** for easy piercing and alleviating strain on the material. The **Tight Star Recess** system is designed to grasp the U-Bit tightly and can be installed with one hand. Underneath the screw head of the U2 CS the **Talon Grip** holds the screw tight to prevent loosening and uses its nibs to dig into the material when countersunk. Below the smooth shank is the **Reamer Thread**, which enlarges the hole in the material to create a larger passage when drawing materials together and reduces tension on the screw head.

The U2 self tapping Construction Screw is available in lengths from 1-1/2" to 20" made of hardened steel, and in lengths from 1" to 8" made of 316 Grade Stainless Steel.

**#10 and #1/4 screws take a T-25 U-Bit.**

**#5/16 screws take a T-30 U-Bit.**

**#3/8 screw takes a T-40 U-Bit.**

# BLACK CONSTRUCTION SCREW

Meet the sibling of our acclaimed construction screw – the U2 CS Black Edition. Crafted as the next generation of self-tapping screws, this black beauty is set to take over from traditional lag screws. The U2 CS Black Edition features a structural-boosting Dome Head. The Tapper Point, equipped with a Cork Screw Start, L-Cut outs, and Blade Cutting Thread, ensures seamless piercing and reduced material strain. With the one-handed installation-friendly Tight Star Recess system and the dependable Talon Grip preventing loosening, the U2 CS Black Edition guarantees a secure and efficient construction process. Elevate your projects with this sophisticated sibling, offering the same reliability with a sleek, black finish.

**#5/16 screws take a T-30 U-Bit, 3/8 takes a T-40 U-Bit.**

# ICF SCREW

The **U2 ICF Screw** is purpose-engineered for today's insulated concrete form (ICF) construction. Designed to make every installation faster and easier, this high-performance fastener delivers strength, precision, and reliability when securing materials directly to ICF walls.

With its **slim 1/4" hex head** and **integrated washer**, the U2 ICF Screw drives effortlessly with an impact driver. Its unique geometry ensures positive engagement with the plastic web inside the ICF block, creating a strong, lasting connection without damaging the foam surface.

# TRUSS SCREW

Engineered for performance and versatility, the **U2 Truss Screw** delivers professional-grade strength in a sleek, low-profile design. Its **full-thread geometry** maximizes holding power through the entire screw length, while the **TRIM head** ensures a clean, flush appearance even in tight connections or visible applications.

Designed for today's builders, this screw drives effortlessly, seats neatly, and holds fast — making it ideal for truss assembly, framing, and other structural fastening needs where reliability and appearance both matter.

**1/4 screw take a T-30 U-Bit**
